

C8 – VIDEO EVIDENCE SHEET

Family Infrastructure Collapse vs 'Family Support & Stability' Claims

This sheet provides official video sources where federal leaders describe families as supported, childcare as more affordable, and youth mental health as improving.

I. WHITE HOUSE - "LOWERING CHILDCARE COSTS"

Context: July 2023 press briefing.

Claim: The Press Secretary states that the economic plan is "lowering costs for childcare and giving parents more flexibility and opportunity."

Use: Contradicted by federal data showing record childcare prices and widespread childcare deserts.

II. PRESIDENTIAL REMARKS - "BREATHING ROOM FOR FAMILIES"

Context: Remarks on the jobs report and the impact of relief programs.

Claim: The President claims that families now have "more breathing room" and the support they need.

Use: Weighed against Census data showing about 40 percent of families with children still struggling to pay usual expenses.

III. HHS - "STRENGTHENING THE CARE ECONOMY"

Context: HHS announcement on care economy initiatives.

Claim: The Secretary states that the care economy is being strengthened and childcare is becoming more affordable and accessible for every family.

Use: Juxtaposed with data documenting high childcare costs and access gaps.

IV. SURGEON GENERAL - "LAYING THE FOUNDATION FOR A HEALTHIER FUTURE"

Context: Advisory on youth mental health and technology.

Claim: The Surgeon General states that investments in mental health supports are laying the foundation for a healthier future for children.

Use: Considered alongside CDC statistics showing persistent sadness and suicidal ideation among teens.

These videos can be linked on the Transparency & Evidence site to let viewers compare optimistic family-support rhetoric with the government's own measures of family hardship and instability.
