

Inflation vs Wages — Evidence Packet

Charts summarizing how the cost of living and financial pressures have grown compared to wages.

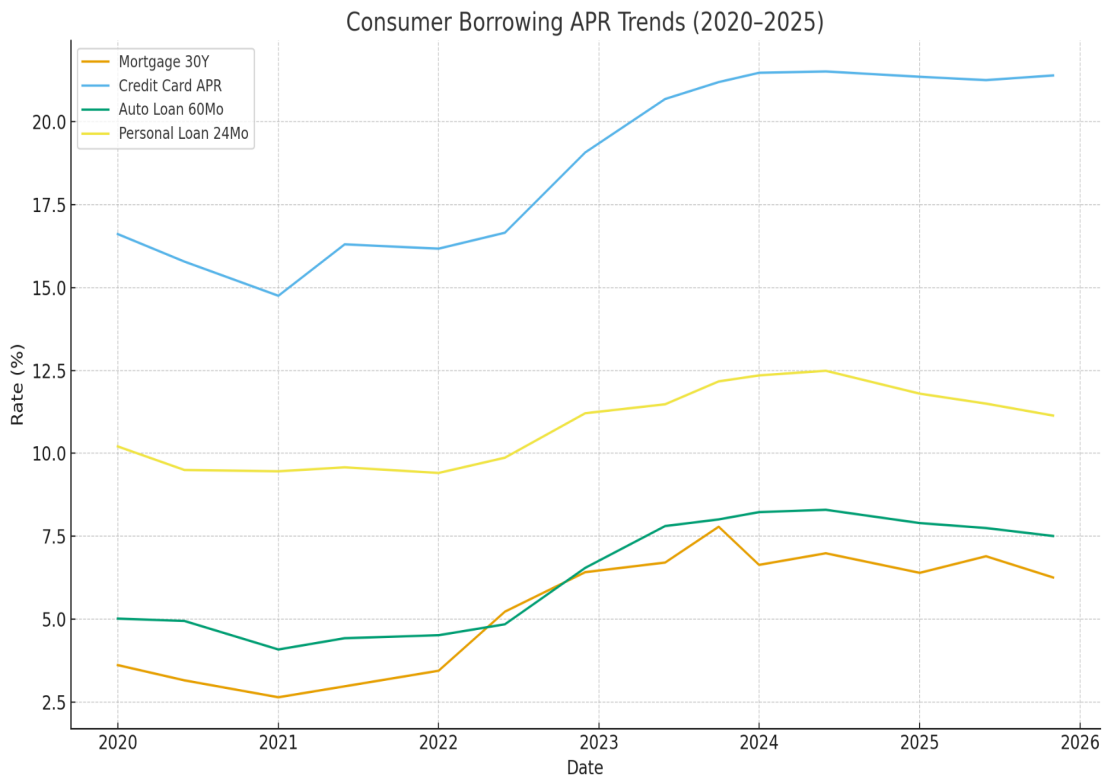

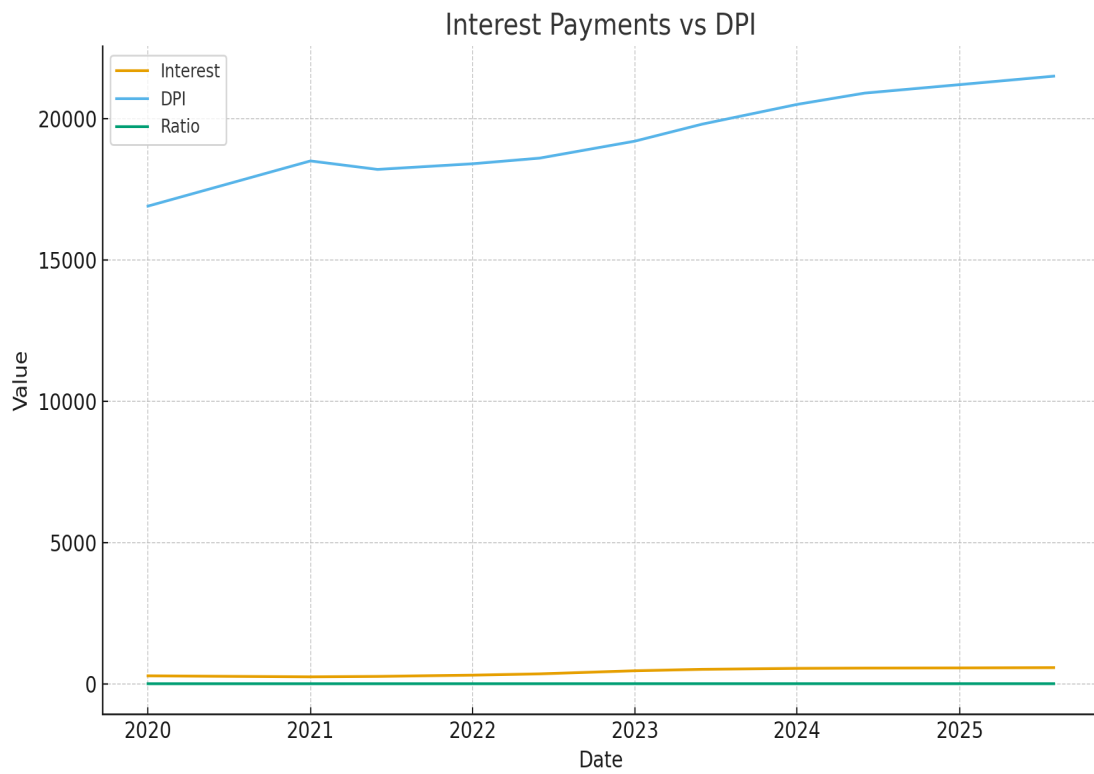

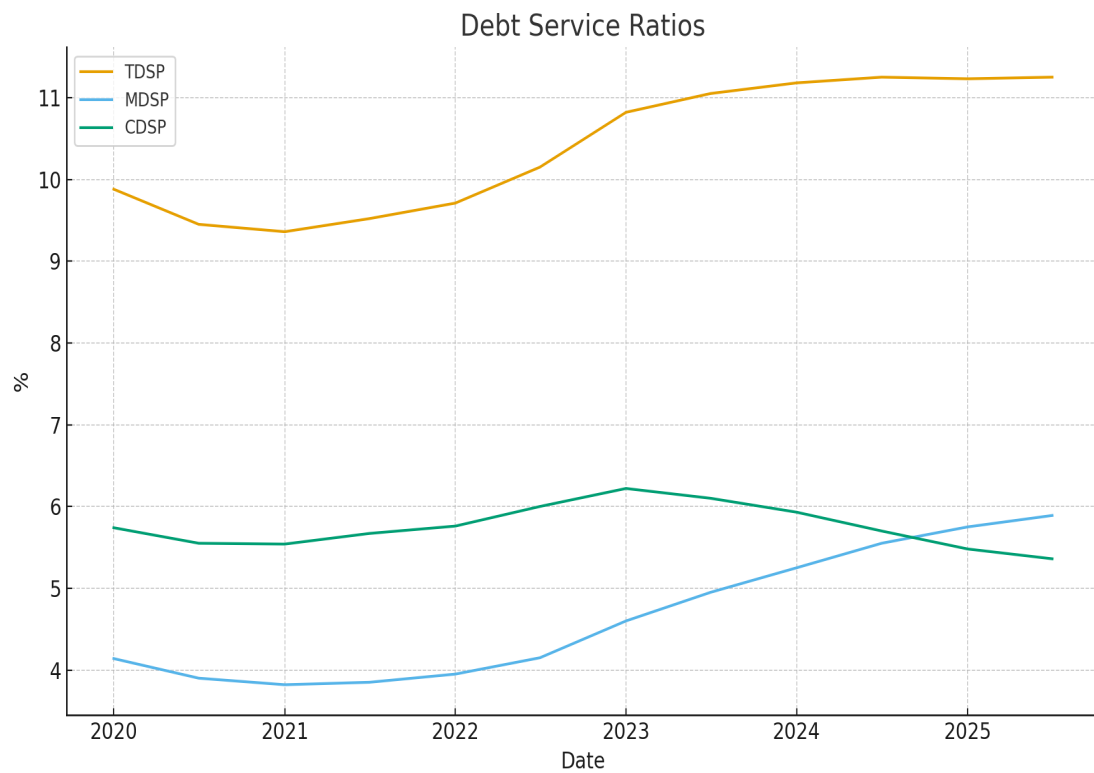

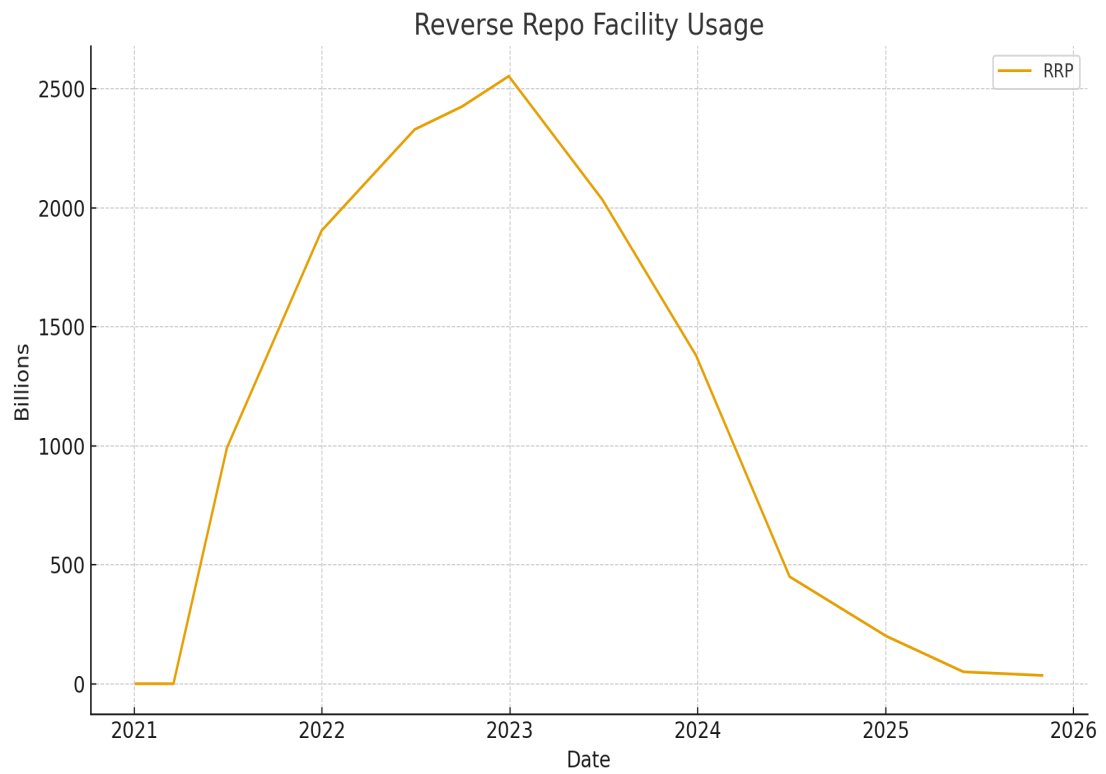

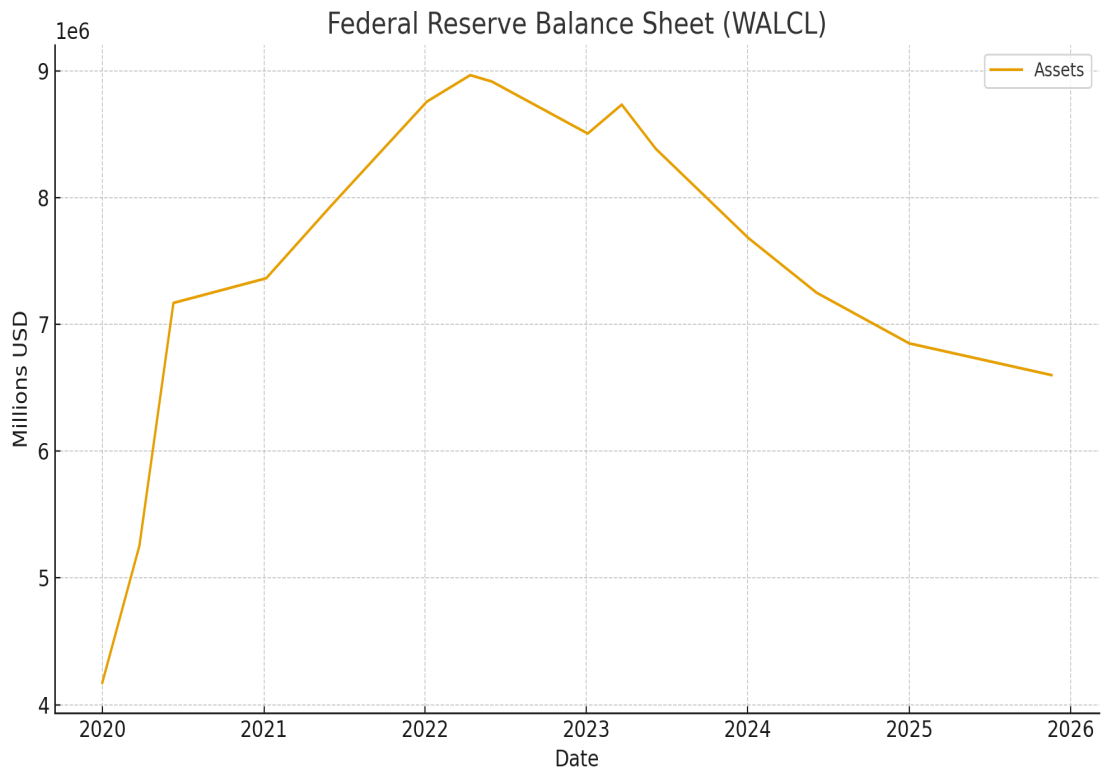

These visuals show the basic pattern: costs like housing, tuition, medical care, and debt have grown much faster than wages, leaving more families rent-burdened, in debt, and living paycheck-to-paycheck.

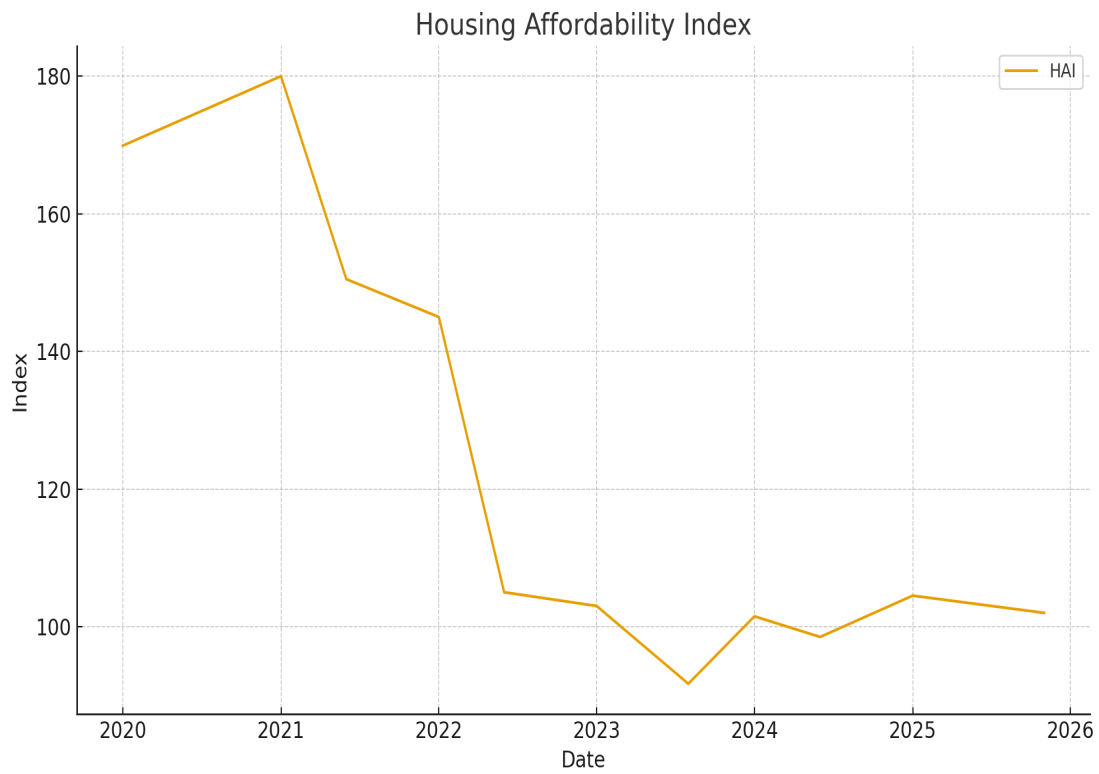

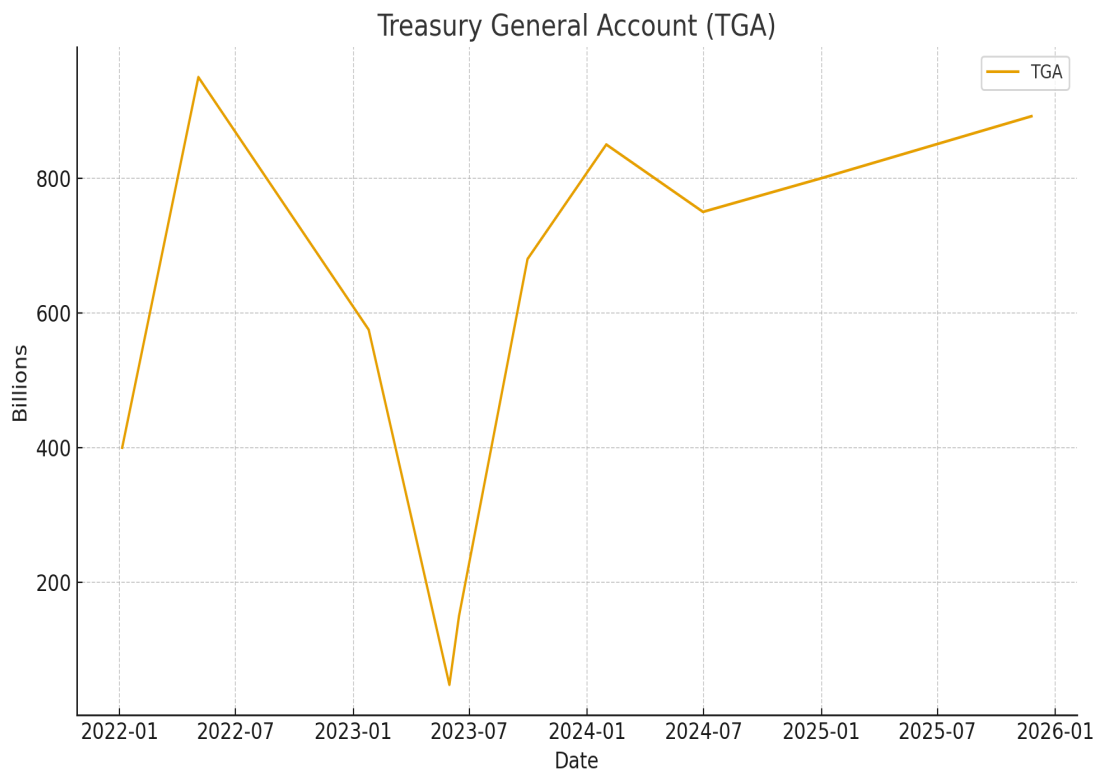

Inflation vs Wages — Evidence Packet (Updated)

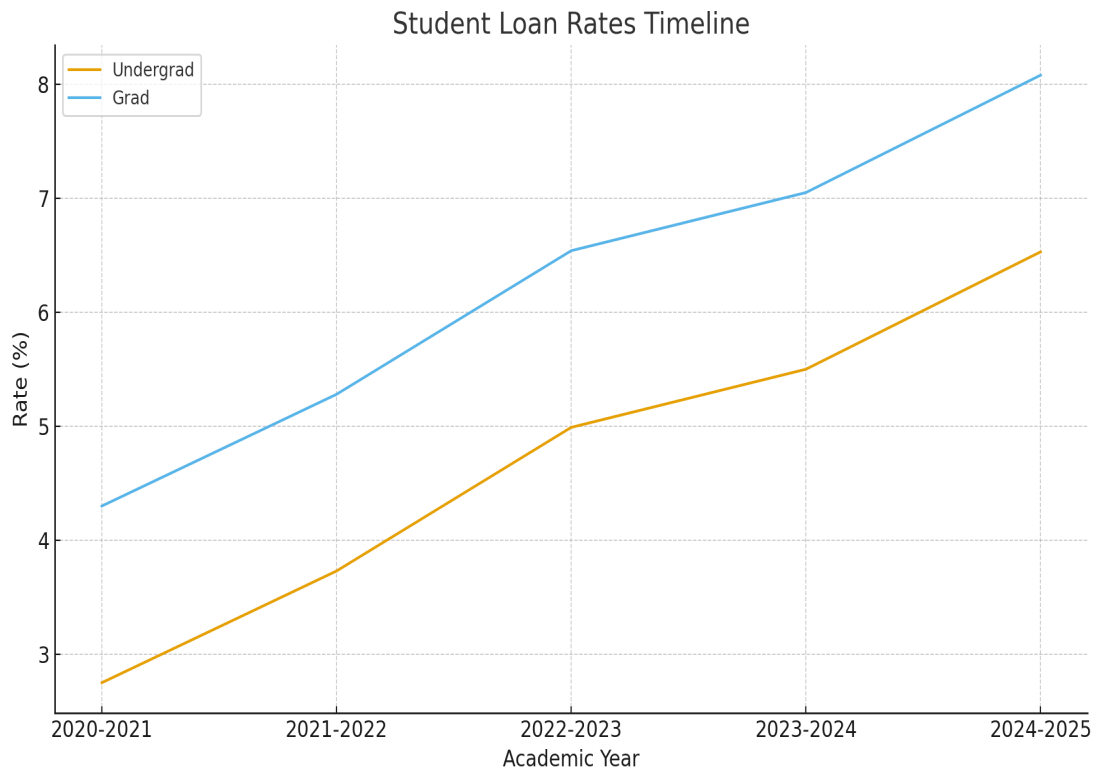

This packet includes all major Inflation vs Wages charts, illustrating how living costs have grown compared to wage growth, debt levels, and corporate profit margins.

These visuals collectively demonstrate the widening gap between wages and essential costs, driven by rising housing, tuition, corporate profit margins, and consumer debt burdens.
